

## DANGEROUS GOODS IN BAGGAGE

### GENERAL INFORMATIONS

It is forbidden to transport any chemical, toxic, explosive material... that could be hazardous to your health and your properties and those of other passengers and crew or the safety of the plane.

You will find below all the requirements for the transport of dangerous goods in the baggage of flights operated by ASL AIRLINES FRANCE.

ATTENTION: a dangerous goods permitted for example in luggage placed in the hold, may be prohibited in luggage placed in the cabin, and vice versa.

ANY DANGEROUS GOODS, NOT EXPRESSLY AUTHORIZED, IS PROHIBITED, BY DEFAULT, IN LUGGAGE OR ON THE PASSENGER HIMSELF.

In cases of prohibition of dangerous goods in baggage or on the passenger himself, these dangerous goods (or object and equipment containing it) will eventually be shipped as cargo under certain conditions. It is then necessary to contact a broker or freight forwarder to verify that the shipment is actually possible and know the steps and associated conditions. For information, the sending by post of dangerous goods is strictly limited: inquire at your post office.

For any questions about dangerous goods in baggage, contact  
[supportclients@aslairlines.com](mailto:supportclients@aslairlines.com).

All Portable Electronic Devices containing lithium batteries and all spare batteries, as well as power banks, are prohibited in the checked baggage of ASL AIRLINES FRANCE flights

### EXAMPLE OF COMMON ARTICLES

	Energy (Wh)/ Quantity (g)	Prior ASL AIRLINES FRANCE approval	Checked Baggage	Carry-on baggage
<ul style="list-style-type: none"> <li>• Cameras, mobile phones, laptops, tablets</li> <li>• e-cigarettes</li> <li>• Medical devices</li> </ul> Up to 10 Portable Electronic Devices per passenger.	$\leq 100$ Wh $\leq 2$ g	NOT REQUIRED	PROHIBITED	YES
	$> 100$ Wh et $\leq 160$ Wh $> 2$ g et $\leq 8$ g	REQUIRED		
	<ul style="list-style-type: none"> <li>• Spare/loose batteries and / or power banks</li> </ul> Up to 10 Spare batteries and/or power banks per passenger	$> 160$ Wh $> 8$ g	PROHIBITED IN CHECKED AND CARRY-ON BAGGAGE	
<ul style="list-style-type: none"> <li>• Self-balancing devices or wheels.</li> </ul>			PROHIBITED IN CHECKED AND CARRY-ON BAGGAGE	

If the energy is not indicated on the battery or the cell, you can calculate it by multiplying the voltage (V) by the electrical current (Ah). Example: 2.5V x 4Ah = 10 Wh.

**For details on these items and other items subject to transport restrictions, please refer to the conditions below.**

## CONDITIONS FOR TRANSPORTATION OF LITHIUM BATTERIES AND CELLS IN BAGGAGE

Lithium batteries equip many portable electronic devices (computers, mobile phones, DVD players, medical equipment...) In case of short circuit, lithium (ion or metal) batteries can produce a lot of heat, or can catch fire if they are damaged, subjected to a shock (a fall for example), poorly designed or assembled.

The lithium batteries and lithium cells must be transported in accordance with the instructions given below to prevent danger to yourself and other passengers.

The lithium batteries are classified into 3 categories according to their energy calculated in Watt/hour, abbreviated Wh, for lithium ion or lithium polymer batteries and their quantity in grams, abbreviated g, for lithium metal batteries

Examples of electronic devices containing or not lithium battery (not exhaustive list)	Category	Energy(Wh)/ Quantity (g)	Prior ASL AIRLINES FRANCE approval	Checked Baggage	Carry-on Baggage
Consumer electronic devices containing small lithium batteries, such as audio players, calculators, camcorders, cameras, mobile phones, laptops, tablets, small power tools, e-cigarettes ... (see <a href="#">note 1</a> below)	Batteries contained in a device	≤ 100 Wh ≤ 2 g	NOT REQUIRED	PROHIBITED	YES
	Spare Batteries (including Power Bank type external chargers) (see <a href="#">note 2</a> below)			PROHIBITED	Up to 10 per passenger
Medical devices and other devices , automatic external defibrillators (AED) , nebulizers, portable oxygen concentrators (POC), continuous positive airway pressure (CPAP) , video cameras, power tools , drones ... (see <a href="#">note 1</a> below)	Batteries contained in a device	> 100 Wh and ≤ 160 Wh > 2 g and ≤ 8 g	REQUIRED	PROHIBITED	YES
	Spare Batteries (including Power Bank type external chargers) (see <a href="#">note 2</a> below)			PROHIBITED	Up to 2 per person (included in the 10 above)
Large batteries for industrial devices, vehicles, Mobility Aids...	Batteries contained in a device or spare batteries	> 160 Wh > 8 g	PROHIBITED IN ALL BAGGAGE		
Small lithium battery-powered vehicles such as air wheel, solo wheel, hover board, mini-segway, balance wheel, scooters, skateboard..., with or without battery.			PROHIBITED IN ALL BAGGAGE		
Diving lamp and headlight equipped with lithium battery or other type of battery (see <a href="#">note 1</a> )	Batteries contained in a device	≤ 160 Wh ≤ 8 g	REQUIRED	PROHIBITED	YES
Luggage equipped with removable lithium battery (see <a href="#">note 1</a> ).					

### Notes

- (1) Each passenger is limited to a maximum of 10 Portable Electronic Devices.
- (2) Lithium Spare battery terminals must be individually protected so as to prevent short-circuit by placement in original retail packaging or by otherwise insulating terminals, e.g. by taping over exposed terminals or placing each battery in a separate plastic bag or protective pouch and must be carried only in carry-on baggage.  
Each passenger is limited to a maximum of 10 spare batteries and / or external chargers. It is forbidden to charge an electronic device by using an external charger on board our aircraft.
- (3) If the energy is not indicated on the battery or the cell, you can calculate it by multiplying the voltage (V) by the electrical current (Ah). Example: 2.5V x 4Ah = 10 Wh.
- (4) Special conditions apply to electric wheelchairs (including those powered by lithium batteries). See pages 4 and 5 requirements for electric wheelchairs

## CONDITIONS FOR TRANSPORT OF OTHER DANGEROUS GOODS IN BAGGAGE

Type of goods	Permitted in Carry-on baggage		
	Permitted in Checked baggage		Prior ASL AIRLINES FRANCE approval Required
<b>Alcoholic beverages</b> , not more than 70°. Max 5 liters per passenger. <b>Note 5:</b> subject to the provisions relating to security (for the cabin) and / or to customs.	NO	YES	
<b>Cartridges and ammunition</b> for hunting and sport rifles	<b>YES</b>	YES	NO
<b>Avalanche rescue backpack</b> , one (1) per person, containing a cartridge of compressed non-flammable, non-toxic gas. May also be equipped with a pyrotechnic trigger mechanism containing no more than 200 mg net of Div. 1.4S. The backpack must be paced in such a manner that it cannot be accidentally activated. The airbags within the backpacks must be fitted with pressure relief valves.	<b>YES</b>	YES	YES
Empty <b>Camping stoves and fuel containers</b> . Filled Camping stoves and fuel containers are forbidden.	<b>YES</b>	YES	NO
<b>Chemical Agent Monitoring Equipment</b> .	<b>YES</b>	YES	YES
<b>Disabling devices</b> such as mace, pepper spray, etc. containing an irritant or incapacitating substance.		<b>PROHIBITED</b>	
<b>Dry ice (carbon dioxide, solid)</b> , in quantities not exceeding 2.5 kg per person when used to pack perishables.	<b>YES</b>	YES	YES
<b>E-cigarettes</b> containing batteries and their batteries must be individually protected to prevent accidental activation. Using or charging an electronic cigarette is strictly prohibited on board our aircraft.	NO	NO	YES
<b>Electro shock weapons</b> (e.g. Tasers) containing dangerous goods such as explosives, compressed gases, lithium batteries, etc. are forbidden in carry-on baggage or checked baggage or on the person.		<b>PROHIBITED</b>	
<b>Fuel cells</b> containing fuel, powering portable electronic devices (e.g. cameras, cellular phones, laptop computers and camcorders)	<b>YES</b>	NON	OUI
Up to 2 <b>fuel cell cartridges, spare</b> for portable electronic devices.	<b>YES</b>	YES	YES
<b>Fuel cell engines</b> .	<b>YES</b>	YES	NO
<b>Gas cartridges, small, non-flammable, non-toxic</b> containing carbon dioxide or other suitable gas fitted into a <b>self-inflating safety device</b> such as a life jacket or vest.	<b>YES</b>	YES	YES
<b>Gas cylinders, non-flammable, non-toxic</b> worn for the <b>operation of mechanical limbs</b> . Also, spare cylinders of a similar size if required to ensure an adequate supply for the duration of the journey.	NO	YES	YES
<b>Hair curlers containing hydrocarbon gas</b> , up to one (1) per passenger. These hair curlers must not be used on board the aircraft at any time. Gas refills for such curlers are not permitted in checked or carry-on baggage.	NO	YES	YES
<b>Heat producing articles</b> such as underwater torches ( <b>diving lamps</b> and headlight) and soldering irons.	<b>YES</b>	NO	YES
<b>Insulated packagings containing refrigerated liquid nitrogen</b> (dry shipper), fully absorbed in a porous material containing only non-dangerous goods.	NO	YES	YES
<b>Internal combustion engines</b> .		<b>PROHIBITED</b>	
<b>Lamps, energy efficient</b> when in retail packaging intended for personal or home use.	NO	YES	YES
<b>Lithium batteries, spare/loose, including power banks</b> . The batteries must be individually protected to prevent short circuits. <b>Note 6:</b> refer to the table on previous page.		<b>Note 6</b>	
<b>Matches, safety (one small packet) or a small cigarette lighter</b> . Lighter fuel and lighter refills are not permitted. <b>Note:</b> "Strike anywhere" matches, "Blue flame" or "Cigar" lighters are forbidden.	NO	ON ONE'S PERSON	
<b>Mobility Aids with non-spillable or spillable batteries with electrolyte or with lithium batteries</b> . <b>Note 7</b> see pages 4 and 5 specific conditions for Mobility Aids.	<b>YES</b>	<b>Note 7</b>	
<b>Non-radioactive medicinal or toiletry articles</b> (including aerosols) such as hair sprays, perfumes, colognes and medicines containing alcohol; and	NO		YES
<b>Non-flammable, non-toxic aerosols</b> , with no subsidiary risk, for sporting or home use.  The total net quantity of non-radioactive medicinal or toiletry articles and non-flammable, non-toxic aerosols must not exceed 2 kg or 2 L and the net quantity of each single article must not exceed 0.5 kg or 0.5 L. Release valves on aerosols must be protected by a cap or other suitable means to prevent inadvertent release of the contents. <b>Note 8:</b> subject to the provisions relating to security.	NO	YES	NO
<b>Oxygen or air, gaseous, cylinders required for medical use</b> . The cylinder must not exceed 5 kg gross weight. <b>Note:</b> Liquid oxygen systems are forbidden for transport.	<b>YES</b>	YES	YES
<b>Permeation devices</b> for calibrating air quality monitoring equipment.	<b>YES</b>	YES	NO
<b>Portable electronic devices (PED) containing lithium cells or batteries</b> , including medical device. <b>Note 6:</b> Refer to the table on previous page.		<b>Note 6</b>	
<b>Portable electronic devices containing non-spillable batteries</b> with electrolyte.	<b>YES</b>	YES	YES
<b>Radioisotopic cardiac pacemakers</b> or other devices, including those powered by lithium batteries, implanted into a person or fitted externally, or radiopharmaceuticals contained within the body of a person as the result of medical treatment.	NO	ON ONE'S PERSON	
<b>Security-type equipment</b> etc. incorporating dangerous goods, such as lithium batteries and/or pyrotechnic material.		<b>PROHIBITED</b>	
<b>Specimens, non-infectious</b> , packed with small quantities of flammable liquid.	<b>YES</b>	YES	YES
<b>Thermometer, medical or clinical</b> , which contains mercury, one (1) per person for personal use, when in its protective case.	NO	YES	NO
<b>Thermometer or barometer, mercury filled</b> carried by a representative of a government weather bureau or similar official agency.	<b>YES</b>	NO	YES
<b>Weapons for hunting or sport</b> .	<b>YES</b>	YES	NO

## SUMMARY OF DANGEROUS GOODS REQUIRING PRIOR APPROVAL OF ASL AIRLINES FRANCE

Contact [supportclients@aslairlines.com](mailto:supportclients@aslairlines.com), your travel agent or tour operator who will contact the company at least 72 hours before your trip (at least 96 hours for electric wheelchairs with wet batteries).

In the absence of approval by ASL AIRLINES FRANCE, your registration will be delayed and we will not accept to transport the items listed below.

- **Ammunitions (cartridge for weapons, small arms).**
- **Avalanche Rescue Backpack containing cartridge of non-flammable, non-toxic compressed gas.**
- **Diving lamp and headlight** equipped with lithium battery or other type of battery.
- **Camping stoves and fuel container that have contained a flammable liquid fuel** of which the fuel tank and/or the fuel container is empty.
- **Carbon Dioxide, Solid (dry ice)** used to pack perishables.
- **Chemical Agent Monitoring Equipment.**
- **Fuel cell.**
- **Fuel cell engines.**
- **Fuel cell cartridges, spare.**
- **Gas cartridges, small, non-flammable, non-toxic** containing carbon dioxide or other suitable gas fitted into a **self-inflating safety device** such as a life jacket or vest.
- **Heat producing articles** such as underwater high intensity lamps and soldering irons.
- **Hunting and sport rifles.**
- **Lithium ion batteries, spare/loose and power banks** with a Watt-hour rating exceeding 100 Wh but not exceeding 160 Wh.
- **Lithium metal batteries, spare/loose** with a lithium content exceeding 2 g but not exceeding 8 g.
- **Luggage equipped with a removable lithium battery.**
- **Mobility aids:** Electric wheelchairs or other similar means of movement equipped with liquid electrolyte battery or lithium battery. See below for specific conditions for Mobility Aids

**Note:** Small lithium battery-powered vehicles such as air wheel, solo wheel, hover board, mini-segway, balance wheel, scooters, skateboard... with or without battery, are not mobility aids and are not accepted in checked baggage or cabin by ASL AIRLINES FRANCE, regardless of their energy (Wh).

- **Oxygen or air, gaseous, cylinders** required for **medical use.**
- **Permeation devices** for calibrating air quality monitoring equipment.
- **Portables Electronic devices powered by lithium batteries.** For portable electronic devices (including medical electronics), lithium ion batteries of which the power to watt hours is between 100 Wh and 160 Wh. For portable medical electronic devices only, lithium metal of which the lithium content is between 2 g and 8 g.
- **Portable electronic devices containing non-spillable batteries** with electrolyte.
- **Thermometer or barometer, mercury filled** carried by a representative of a government weather bureau or similar official agency.
- **Weapons for hunting or sport.**

## CONDITIONS FOR TRANSPORT ELECTRIC WHEELCHAIR

Transporting electric wheelchair is subject to prior approval by ASL AIRLINES FRANCE

We recommend you to report your transportation request no later than 72 hours (3 days) before your flight to check whether the characteristics of your wheelchair allow it to be transported safely.

*For electric wheelchairs with wet batteries, you must contact the company **at least 96 hours (4 days) before your flight.***

Contact [supportclients@aslairlines.com](mailto:supportclients@aslairlines.com).

Your wheelchair must be registered as checked baggage.

Upon arrival, your wheelchair will be returned upon delivery of baggage.

There are 3 types of powered wheelchairs according to the type of batteries (see next page):

### 1. Lithium battery-powered wheelchairs

- The energy of the battery must not exceed 300 Wh or 160 Wh in case of two batteries.
- The terminals of the battery needs to be protected against short-circuits.
- The electrical circuits must be inhibited.
- The chair must be secured and protected from damage during transport.
- If the battery or batteries are removable , they must be :
  - withdrawn from the chair,
  - isolated against short circuits by covering the exposed terminals with tape or placing each battery in a plastic bag or a separate protective sleeve and
  - carried in cabin.

### 2. Battery-powered wheelchairs with spillable batteries (also called “dry batteries”):

- The battery may remain attached to the wheelchair or similar mobility device if it is well affixed.
- The terminals need not be disconnected if they are already inside of a cell case or isolated (to avoid any short circuits).
- The motor is disengaged.

### 3. Battery-powered wheelchairs with non-spillable wet batteries (also called “wet batteries”):

Because these batteries can compromise the safety of the flight, their transport requires special precautions and will be refused on board if preliminary information is not provided. Contact ASL AIRLINES FRANCE (or your travel agent) to know their transport conditions at the latest 96 hours (4 days) before your flight.

## PROHIBITED GOODS ON BOARD

### Non exhaustive list

- **Acids and alkalis**, e.g. 'wet' batteries that are leaking, caustic soda.
- **Aerosols flammable or toxic**, e.g. domestic, cleaning or home improvement products... such as ink, paint, varnish and enamel of any kind (even water-based), acetone, alcohol, paint thinner, ethanol, gas, lighter fluid.
- **Aerosols non-flammable for cosmetic use, sporting or home with a capacity of 500 mL.**
- **Aerosols or stun devices, stun, neutralizing agents**, e.g. pepper spray, tear gas, mace, etc.
- **Alcoholic beverages** containing more than 70% alcohol by volume.
- **Baggage equipped with a non-removable battery**
- **Batteries with electrolyte** except for some mobility aids (see electric wheelchair).
- **Bottle for camping stove.**
- **Cartridges or toner printers.**
- **Chemicals**, e.g. fertilizers, herbicides, insecticides, pesticides.
- **Corrosive or bleaching substances**, e.g. mercury, chlorine bleach.
- **Dive Tanks containing oxygen or other gas.**
- **Electric bike with lithium battery.**
- **Electro shock weapons** (e.g. Tasers) containing dangerous goods such as explosives, compressed gases, lithium batteries, etc.
- **Explosives, detonators, primers and explosive devices, mines and other military explosive devices, ammunition** unless the ammunition for hunting or sport which are subject to prior agreement. Contact ASL AIRLINES FRANCE.
- **Fire extinguishers.**
- **Firearms**, of defence, war, fair shooting, lounge..., **grenades, dummy ammunition or firearms, pistols or rifles of all kinds**, except for hunting or sporting rifles that are subject to prior agreement. Contact the airline.
- **Firecrackers, fireworks or flares** in any form.
- **Flammable liquid fuel**, e.g. petrol, diesel, lighter fuel, alcohol, ethanol.
- **Flammable liquids**, e.g. fuel, thinner, solvent, acetone.
- **Gases and gas cylinders**, e.g. butane, propane, acetylene, oxygen in large volumes.
- **Liquid Oxygen.**
- **Lithium batteries with a Watt-hour rating exceeding 160 Wh.** See page 2 for specific requirements for lithium batteries.
- **Materials that can catch fire or capable of spontaneous combustion**, e.g. phosphorus.
- **Matches, lighters and lighter fuel**, except safety matches (one small packet) or a small cigarette lighter carried on the person (**FORBIDDEN IN BAGGAGE**).
- **Motorized baggage** with or without lithium battery.

- **Paint, varnish, lacquer, turpentine and paint thinner.**
- **Radioactive material**, e.g. medicinal or commercial isotopes.
- **Refrigerator or refrigerating machine.**
- **Security-type attaché cases, cash boxes, cash bags**, etc. incorporating dangerous goods, such as lithium batteries and/or pyrotechnic material.
- **Self-balancing devices or appliances to move using a lithium battery**, such as unicycles, segways, hover board, Solo wheel, scooters, skateboard ... with or without battery.

Examples of Self balancing devices

- **Toiletry articles of more than 500 g or 500 mL**
- **Toxic materials, infectious or biologically hazardous**, e.g. arsenic, infected blood, bacteria and viruses.
- **Thermometer, medical or clinical**, which contains mercury.
- **TV set, TV screen.**

## PROHIBITED GOODS IN CARRY-ON BAGGAGE

- **Aerosols for cosmetic use beyond 100 mL.**
- **Sporting or home aerosol.**
- **Mobility Aids: Battery-powered wheelchairs or other similar mobility device**
- **Sporting equipment** : tennis racket, baseball bat, cricket bat, hockey stick, leather ball, pool cue, fishing pole, golf club, hockey stick, paddle, martial arts equipment (e.g. protection of finger joints, hockey sticks, flails, nun chucks...), rigid and flexible stick (e.g. batons...), skateboard, scooter...
- **Cartridges and ammunition for hunting and sport rifles.**
- **Blunt work tools** including sledgehammer, hammer, chisel, screwdriver...
- **Perfume bottle and liquid products exceeding 100 mL.**
- **Blades and any sharp, blunt, metallic or non-metallic items that may be used as weapons** (e.g. knife, nail scissors, razor blades, sabre, sword, leaded cane, crossbow, archery equipment, etc.)

## PROHIBITED GOODS IN CHECKED BAGGAGE

- **Any spare lithium or not lithium battery**, including **Power Bank** type external chargers.
- **All Portable Electronic Devices containing lithium battery.**
- **Baggage equipped with lithium battery**
- **Lithium batteries that can be removed from an electric wheelchair or similar mobility aid.**
- **E-cigarettes and batteries** (use or charge an electronic cigarette is strictly prohibited on board our aircraft).
- **Fuel cells containing fuel**, powering portable electronic devices.
- **Heat producing articles** such as underwater torches (diving lamps and headlight) and soldering irons.
- **Mercury filled thermometer or barometer, carried by a representative of a government weather bureau or similar official agency.** *A small mercury fever thermometer for personal use is permitted in checked baggage **provided it is kept in its protective case.***
- **Underwater torches (diving lamps).**

## INFORMATIONS FOR DIABETICS

For more information, refer to the guide produced by the Association Française des Diabétiques in collaboration with the French Civil Aviation Authority: [Diabète à l'aéroport](#) (in French only).
